Learnsoft

Release Notes

v6.22.04.347 (Items deployed December 2022 - Release Date 1/11/2023)

Updated For All Clients

ID	Title	Release	Feature	Benefit
4109	Can Certificate Description be added to the list options in Words for notifications	v6.22.04.347	**Added certification Description variable to Learning Object notification.**	Now we can send the certification description in the email .

Updated For Individual Client but Available to All Clients with selected Features

ID	Title	Release	Feature	Benefit
4511	Request for Popup Message if Setting up LOI with Pending Status and not updating Launch Date	v6.22.04.347	Provides Pop Up Message When Setting LOI to Pending Status And Not Updating Launch Date. Prompts Admin to select a future launch date so back end service will not auto change status to Scheduled.	Eliminates frequent set up mistake ensuring that LOIs marked Pending Remain in that Status until the planned time they are to become Scheduled and Available for User Enrollment. Eliminates mistaken Enrollments in LOI not yet ready for enrollments.
4533	Update Competency List Search so prior lookup remains after preceptor manager or admin returns from details	v6.22.04.347	For Competency Dashboard Lookups, keeps the current search criteria even after Preceptor updates any associated competency details vs. current process where the lookup criteria is lost after a change and the Preceptor needs to perform the lookup again each time.	WIll save significant time when reviewing and updating competencies as a search can be performed one time and each successive competency update can be performed without losing the search parameters and forcing a new lookup.
4556	Add Due Date to Completion Report Excel Exportable	v6.22.04.347	Adds Column Due Date to Completion Report Excel Exportable. For Courses with assigned Due Dates, provides sortable, searchable data lookup. For those without due date, leaves blank.	Allows for greater lookup and sorting capabilities for managers and compliance ensuring prioritized company information is easily found and more accurately reported.
